

Intelligence Incident Report

Document ID: IR-2026-017

Classification: Internal Intelligence Report

Date of Report: 18 March 2026

Executive Summary

This report summarizes a suspected terrorist incident that occurred in northern India. Information has been compiled from publicly available sources for testing and research purposes. The report is intended to demonstrate document processing and information extraction capabilities.

Incident Details

Incident Date: 14 February 2019

Location: Lethpora, Pulwama District, Jammu and Kashmir, India

A convoy of the Central Reserve Police Force (CRPF) was travelling along National Highway 44 when an explosives-laden vehicle rammed into one of the buses. The resulting explosion caused extensive damage and significant casualties among security personnel.

Initial investigations indicated that the attack was carried out by the terrorist organization **Jaish-e-Mohammed (JeM)**. Following the incident, security agencies launched extensive search operations throughout the surrounding region while forensic experts collected evidence from the blast site.

Structured Information

Attack Type: Suicide Bombing

Weapon Used: Vehicle-Borne Improvised Explosive Device (VBIED)

Primary Target: CRPF Convoy

Responsible Group: Jaish-e-Mohammed (JeM)

Killed: 40

Injured: 35

Operational Response

The National Investigation Agency (NIA) initiated an investigation immediately after the incident. Security forces established additional checkpoints and increased surveillance across vulnerable locations to prevent similar attacks.

The incident highlighted the importance of rapid intelligence sharing and structured information analysis for supporting operational decision-making.
